

NEW PRODUCTS

Fastbind summer break

As part of our annual summer break, please note that our production facilities will be closed from July 11, through Monday, August 11, 2025.

During this period, our offices, warehouse, logistics, and technical support will remain operational, albeit with reduced capacity. As a result, response times may be slightly longer than usual. Kindly copy office@fastbind.com on all correspondence during this time to help ensure a prompt response.

We will continue to process and ship orders for machines and consumables subject to stock availability. Regular and timely shipping will fully resume in September.

Exhibitions this summer:

After the holidays, we'll be resuming our activities in many international exhibitions and trade shows as well as several local events and distributor's open doors. You will be able to meet us directly or see live demos of Fastbind solutions on our distributors' stands and at the following events:

LabelExpo

Fira Gran Via, Barcelona
Spain
September 16-19, 2025

Print Show UK

NEC Birmingham,
United Kingdom
Hall 1
September 23-25, 2025

FASTBIND GOES XXL!

SMART AUTOMATION MEETS EXCEPTIONAL BINDING QUALITY

After the success of the Fastbind ONE Handy and Fastbind ONE Sense Ultra, we have decided to develop their big sisters: the Fastbind ONE Handy XXL and Fastbind ONE Sense Ultra XXL. They can bind up to 457x457 mm and always with flexibility in mind.

The **Fastbind ONE Sense Ultra XXL**, powered by SMART Sense™ technology, sets a new standard for fully automated bookbinding in digital production environments. Exceptionally versatile, it produces hardcovers, softcovers, tear-off pads, and strip-bound books with ease. With a simple press of a button, you can bind anything from miniature A6 formats up to square 457 x 457 mm (or SRA3+ in either orientation), and up to 50 mm thick.

Fastbind systems work with nearly all hot-melt glues including EVA and PUR. Thanks to advanced temperature control, **Fastbind ONE Sense Ultra XXL** adapts seamlessly to any glue ensuring reliable results every time.

Featuring a sleek and ergonomic design, this machine fits effortlessly into any environment—from busy copy shops to high-volume print rooms. It is compact, quiet, safe, odor-free, emission-free, and energy-efficient, making it a natural fit for modern, sustainable workflows.

Engineered and manufactured in Finland, the **Fastbind ONE Sense Ultra XXL** is designed for decades of dependable performance. Whether you're producing one book or a thousand per day, its robust construction and proven technology guarantee consistent results.

A touchscreen control panel and motorized clamping, roughening, gluing, and nipping ensure constant, high-quality binding. Integrated sensors automatically measure book size and thickness, adjusting cycles and glue coverage for perfect, repeatable production—every single time.

Ready to run in under 15 minutes with minimal maintenance required, the **ONE Sense Ultra XXL** is easy for anyone to learn, no specialized training needed.

The **Fastbind ONE Sense Ultra XXL** now comes standard with an ergonomic stand, complete with storage cabinet and wheels for optimal comfort, mobility, and workspace organization—along with a fume-extractor connection kit and the PGO Gen 5 spine preparation system.

When it's time to expand capabilities, upgrades are always available, including a hardcover toolkit (nipping bar + guide) and an easy-clean kit for faster PUR tank maintenance.
