

NEW PRODUCTS

During Drupa 2024, Fastbind has unveiled its new generation of ONE perfect binders which includes ONE Handy, ONE Sense Ultra and more.

All ONE models bind up to A4 portrait and landscape format for soft and hard cover books, with any single component glue (Including EVA or PUR), and are specifically designed for a medium-to-short-run or print on-demand operation.

The manually operated Fastbind ONE Handy will be available for shipping at the end of the summer.

The automated Fastbind ONE Sense Ultra will be available during autumn and the semi-automated Fastbind ONE Sense Optima should be introduced in early 2025.

Contact us this summer:

During the summer, our production site will be closed for 4 weeks but our offices remain open. In order to get a quick response to your communications, please send a copy of your emails to: support@fastbind.com.

We have renewed our online store www.fastbindstore.com, so you can send direct orders to the factory. In countries where Fastbind distributors have stock, they will handle the order. If not, we will ship your order directly from our factory.

Our online chat support is still open on week days for all the countries in the world from Fastbind.com.

Enjoy your summer,
The Fastbind team.

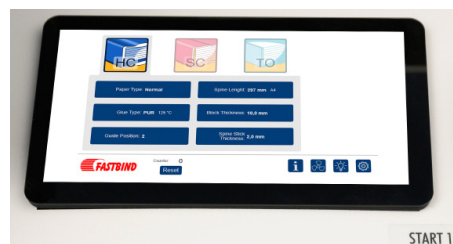

FASTBIND PUREVA SMART CUBE: HIGH QUALITY BINDING WITH SMART AUTOMATION

Fastbind Pureva Smart Cube is a compact semi-automatic tabletop perfect binder. You can bind soft or hard cover books using EVA or PUR glue for all your on-demand and short-run finishing needs up to A3 portrait.

Smart Automation

The Smart's use of intelligent automation makes it easier than ever to perfect bind soft and hard covers. The roughening, gluing and nipping functions are automated for precision, consistency, speed and ease of use.

The maximum speed is 180 books per hour and the working speed, depending on the book type, averages over 100 books per hour.

Digital control panel

The user interface is a color digital touchscreen. You select the parameters for each book: type of cover, type of paper, format. The Pureva Smart self-adjusts to create the best possible binding as the software calculates the optimal pressure, speed and number of cycles for the roughening and gluing steps, as well as the nipping time set up for each program.

Like with any semi-automatic perfect binder, the operator simply places the cover and book block into the machine, positions the book and then removes when binding is completed.

Highest binding strength

PUR glue has become highly important in the world of book binding. More customers demand it and many paper types can only be bound successfully with PUR. Being able to use PUR when you must and EVA in the other cases saves time and money and is a standard feature of the Fastbind Smart Cube Perfect binder.

The same glue tank can be used with both glue with different temperature settings depending on the glue use.

Fast and easy cleaning

With PUR glue, cleaning the tank is still required at the end of each day. But, with Pureva Smart Cube, it is easy and quick to drain and clean the tank of PUR adhesive, with no extra skill required. The pre-programmed cleaning setting does all the hard work and assists the operator through the steps of draining and cleaning the PUR tank as needed.

High quality on-demand perfect binding

The Fastbind Pureva Smart Cube is a well-designed ergonomic binding solution. It is compact, silent, easy to use and it fits in any modern digital printing environment.

Reliable and robust, it combines high binding strength across a variety of paper stocks and increases productivity with a budget-friendly investment.

Safety first

Safety features of the Fastbind Pureva Smart Cube include an integrated light curtain which immediately stops the ongoing operation if there is an object (or hands) approaching the moving parts, ensuring the operators safety.

Soft and Hard covers

An optional hard cover toolkit allows the Pureva Smart to bind hard cover books. The change from soft to hard cover takes just a few seconds.

A special setting for side gluing offers the professional look and finish to your books.
