

NEW PRODUCTS

During this winter, our development team is still working to bring you new products in 2025.

Of course, the main product that will come next year will be the ONE sense Ultra's little sister, the ONE Sense Optima with manual clamping and nipping and automated roughening and gluing.

We are also bringing many new accessories for the ONE binders, including the easy PUR cleaning kit, an ergonomic stand with storage cabinets for the consumables, several spacers to give more flexibility (for different cover types and thicknesses, hard cover offsets...)

We will also bring new consumables like premium printable endpapers and some budget-friendly ones.

Exhibitions this fall:

This autumn, we were present with our distributors and the new binding solutions on several trade shows and events: and the new line of Fastbind binders got a great success:

Africa Print Expo 2024
Gallagher Convention Centre,

September 17-19, 2024
Hall 17, Stand E06

VISCOM 2024
Fieramilano RHO, Milano, Italy
October, 13-15, 2024
Pad 8 Stand B33/C38
and
Pad 8 Stand H29/K32

FASTBIND ONE SENSE ULTRA:

THE ONE MACHINE FOR ALL YOUR BINDING NEEDS

Fastbind ONE Sense Ultra is the ideal automated binding solution in a digital setting. Highly flexible, this perfect binder quickly binds all your jobs reliably.

Highly flexible

Any binding job: ONE Sense Ultra can bind soft cover books and presentations, hard covers but also stripes or coverless tear-off pads.

Any format: ONE Sense Ultra binds all formats from miniature up to 33 x 33 cm (including A4 portrait or landscape) and all thicknesses from one sheet of paper to 50 mm thick without any adjustment between jobs and to the press of one button.

Any adhesive: Fastbind perfect binders are the only ones that are suitable for most hotmelt glues: traditional EVA, PO, metallocene, PUR. With its temperature control, Fastbind ONE Sense Ultra can use any one-component glue.

Any environment: Its ergonomic design fits in any environment from a copy shop to a print room. It is quiet, safe, clean, odorless, emissions free with minimal power consumption.

High productivity with constant quality

Designed and manufactured in Finland, Fastbind ONE Sense Ultra is made to last, whether you make one or 1000 books a day.

In serial production, you get a constant quality of binding, with a strong and perfectly square spine each time.

The automated ONE Sense Ultra comes with touch-screen control panel, motorized-clamping, roughening, gluing and nipping for a constant quality of binding.

Equipped with sensors, the machine will automatically adjust the number of cycles and the pressure needed to bind your book.

To improve the binding precision, Fastbind ONE Sense Ultra is equipped with several innovations for the book clamp, nipping mechanism and our new Paper Grain Opening (PGO) Gen 5 roughener.

Easy to use

For your business, we understand that time is money. Fastbind ONE Sense Ultra is ready to bind in less than 15 minutes from switch on and only requires daily cleaning when used with PUR glue. Anyone can learn to use it in minutes, so you do not need long and expensive training sessions or highly qualified operators.

Modular design

The modular design of Fastbind ONE Sense Ultra enables several upgrades after purchase:

- Hard cover toolkit
- Ergonomic stand
- Easy clean kit for quicker PUR glue tank cleaning and reduced hands-on time.
